

Field IT Support Tech

Experienced IT support technician needed to augment busy IT systems integration / services firm. This position entails providing technical support, general IT services and consulting to our firm's client base throughout the Houston area. Client support is given both onsite at their office, and remotely at our office.

This position will require an experienced technician who is service minded, able to think on their feet, and quickly solve clients' problems. The right person must enjoy helping others, be patient, self-directed, and wants to learn.

Experience is required for typical help desk issues such as general PC hardware diagnostics, operating systems, and server settings. Need experience with MS Small Business Server, Exchange, and general server and PC support. Microsoft and other certifications are a plus. College degree is preferred but not required.

RCL Systems has 20 years of experience providing customized hardware, software, and IT service solutions for small and medium sized businesses. We have many clients in the oil & gas exploration markets.

Please submit your resume and salary requirements to:
jobs@rcl.com
